Satellite Broadband

The use of the internet is invaluable on location both for production and your client, not only can the occupant of the vehicle be connected but any authorised user working within 50 metres of the vehicle. Vroom-with-a-view is unique as it provides internet connection via satellite broadband, the vehicle has a dish mounted on the roof giving coverage throughout the UK & Europe in the remotest of areas. Available now is Mobile Broadband, used mainly in built up urban areas.
